**FIND YOUR VOICE. CHANGE THE WORLD.**

## Future Genius Summer Programs for Ages 10-13

Through exploration of the *United Nations Global Goals for Sustainable Development*, including ending poverty, fighting inequality, and tackling climate change, Future Genius activates youth to become agents of change—future leaders and problem-solvers—energized to transform the planet. More than the sum of its parts, the leadership programs offer a place where young learners come together with a shared mission to better themselves and the world around them. With a focus on personal development—not just academic achievement—Future Genius builds confidence and initiates exciting ideas for making a difference. Learn more at [FutureGenius.org](http://FutureGenius.org).

### **BETA MASTERS** *Video Game Design*

Imagine a small indie game studio that has 5 days to pitch, design and build a new Global Goals video game. Beta Masters work in teams to develop an innovative issue-based game prototype—all with one goal in mind—securing seed investments from friends and family at Friday's beta release party!

### **ECO GENIUS** *Environmental Studies*

Our young environmental scientists are on a Global Goals mission. Through an examination of energy efficiency, food systems, and household waste, Eco Genius studies the human impact on our environment, and how we can lead a more sustainable daily life. The program culminates with an eco footprint challenge, featuring activities designed by our innovative Eco G students.

A week at **Future Genius** provides a unique launch pad to become a successful contributor in the 21st century. No experience is necessary.
